Nicholas Kato

## Senior Full Stack Developer

I am willing to challenge new technology, especially if it makes me better at my craft. Taking my Client's work as my own and taking 100% responsibility for delivering it. Willing to do my best for creditable companies or clients.

## Education

### ● Bachelor's of Computer Science

From April 2010 to September 2014 **Kyoto University** Kyoto, JP

## Work experience

### ● Python / NestJS Back-end Developer

From September 2021 to April 2022 **Sumitomo Corporation** Kobe, JP

- Designed robust, scalable, secure, and globalized web-based applications to ensure the continuity of all business processes and client satisfaction.
- Running web and application servers in the cloud to host dynamic websites using Amazon Web Service(AWS).
- Developed, tested, and debugged software tools utilized by 100+ clients and internal customers to facilitate and easier process and user experience.
- Used the Python and NestJS to develop 3 web-based data retrieval systems.
- Performed data entry and other clerical work for project completion.
- Obtained adequate experience in reviewing Python code for running the troubleshooting test-cases and bug issues, acquiring all necessary skills.

### ● Web & Mobile Developer

From May 2020 to January 2021 **Nippon Koei** Kyoto, JP

- Worked on React Native application development for the iPhone, iPad, and Android.
- Have the usability testing so that menus, buttons, or Links to different pages on your site should be easily visible and consistent on all webpages.
- Designed and implemented application architecture.
- Coordinated agile development process and release cycles.
- Made unit tests and implemented UI test code coverage.
- Profiled and analyzed applications using various development tools.

### ● React & Vue Front-end Engineer

From November 2017 to December 2019 **Konica Minolta** Kyoto, JP

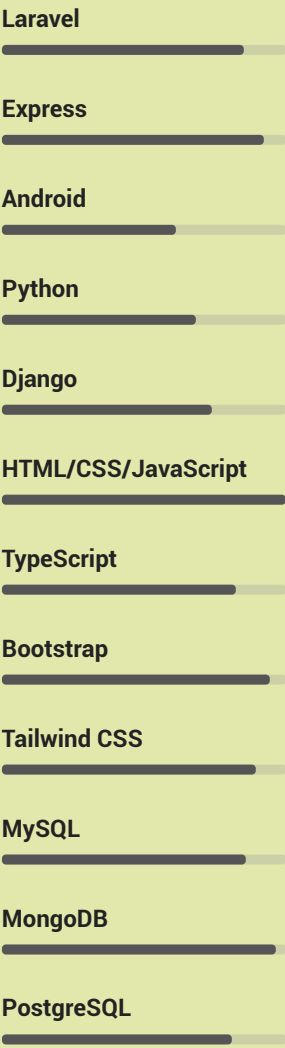

- Have the interface test so that web server handle all application requests without any service denial.
- Developed the front-end code for Ascribe, the first platform for digital art rights management on the Bitcoin blockchain.
- Composed and optimized the back-end code from queries to execution time.
- Built a custom web crawler that could download 1.5 billion images from the web while optimizing resources and execution time.
- Constructed a high-performance reverse-search engine called image-match.

### ● Front-end JavaScript Developer

From August 2015 to May 2017 **DIGITAL GUARDIAN** Massachusetts, US

- Developed UIs using ReactJS with JavaScript and TypeScript.
- Securely stored all public server files on the cloud using AWS, so everyone can comprehensively access them from anywhere.
- Participated in the full lifecycle of development for company web applications using JS framework, including React and Vue.
- Maintained and improved the client portal React application.
