Work experience

11/2017 - 12/2019

Konica Minolta
Kyoto, JP

React & Vue Front-end Engineer

• Have the interface test so that web server handle all application requests without any service denial.
• Developed the front-end code for Ascribe, the first platform for digital art rights management on the Bitcoin blockchain.
• Composed and optimized the back-end code from queries to execution time.
• Built a custom web crawler that could download 1.5 billion images from the web while optimizing resources and execution time.
• Constructed a high-performance reverse-search engine called image-match.

08/2015 - 05/2017

DIGITAL GUARDIAN
Massachusetts, US

Front-end JavaScript Developer

• Used Mocha/Chai to make asynchronous testing simple and fun on the Node.js
• Developed UIs using ReactJS with JavaScript and TypeScript.
• Securely stored all public server files on the cloud using AWS, so everyone can comprehensively access them from anywhere.
• Participated in the full lifecycle of development for company web applications using JS framework, including React and Vue.
• Maintained and improved the client portal React application.
